A STRATEGY FOR PLANNED DEVELOPMENT

The Government of Karnataka is working to give a real meaning to its cherished goal of bringing about socio-economic justice. Through strategic and pragmatic planning, the Government is determined to bring greater benefits to rural areas and the weaker sections of society.

As a part of its programme of action, the Government of Karnataka has moulded its annual plan 1980-81 to the following broad objectives :

(1) To achieve a growth rate of around 7½%.
(2) To reduce the regional imbalances in rural and infrastructural developments.
(3) To create the maximum productive employment.
(4) To further develop power potential and bring a measure of stability to the power system.
(5) To improve rural communications, specially in those rural areas which are still left largely unconnected by any road system.
(6) To set up, through a specific programme the efforts for improving the living standards of the low income, subsistence-level population both in the urban and the rural areas and to draw them into the mainstream of social, economic and cultural development.
(7) To provide farmers with increased facilities in marketing their crops so as to avoid distress sales.
(8) To ensure that the land reform measures become really meaningful by stepping up grants of pattas to the tenants.
(9) To bestow still greater attention to promoting the new welfare measures for Scheduled Castes and Scheduled Tribes and other backward classes and minorities.
(10) To increase the area under irrigation by 1.05 lakh hectares.
(11) To provide 1,00,000 houses for the rural poor.
(12) To intensify agricultural extension services, improving substantially the availability of inputs and other infrastructure.

Issued by the Department of Information & Publicity, Government of Karnataka, Bangalore.

Escorts Limited. One company which feels proud of a job half done.

Not many companies feel that way.

But Escorts does.

That's because Escorts believes in a philosophy that has become a discipline with them.

That of sharing. And of interdependence.

A belief that has led to growth and development in the small scale sector.

Today, 70% of the components of all major Escorts products are made by over 2000 ancillary suppliers from all over the country—the Company having provided technical as well as financial assistance when needed.

This has helped the small scale sector to mass-produce and specialise, with many of these manufacturers even exporting quality components to industrialised countries.

This policy of 'interdependence' is paying off in a big way.

Not merely is it a socio-economic concept of business, but it is broadening the industrial base of the nation in the transfer of technology and professional management.

And now, when Escorts looks at the encouragement it has given to its fellow countrymen in the small scale sector, it only deepens the Company's determined belief that a job 'half done' this way is a job well done.

Indeed, in whatever Escorts does, it remains committed in continuing its role of leadership, —in full co-operation with national needs.

It has been a company steered by one guiding spirit all through the years.

The spirit of Enterprise.

The Growth Imperative

Why Bakelite Hylam researchers are committed to development

At Bakelite Hylam, we consider scientific research necessary for industrial growth. Research and Development is, quite simply, an investment in the future.

This philosophy is being put into practice by our researchers. It has resulted in the development and manufacture of a whole range of sophisticated materials based on thermosetting polymers: Industrial Laminates and Moulding Materials for electrical, electronic and telecommunication industries; Polyester Resins for chemical and chemical engineering, transport, and defence industries; Phenolic Resins for automotive, foundry, abrasives and adhesives industries; Insulating Varnishes for electrical machinery and equipment; and Decorative Laminates that are even functional.

We consider Research and Development a serious activity. Because we believe that a world that's always changing is always in need of new and better materials.

At Bakelite Hylam the search is always on.

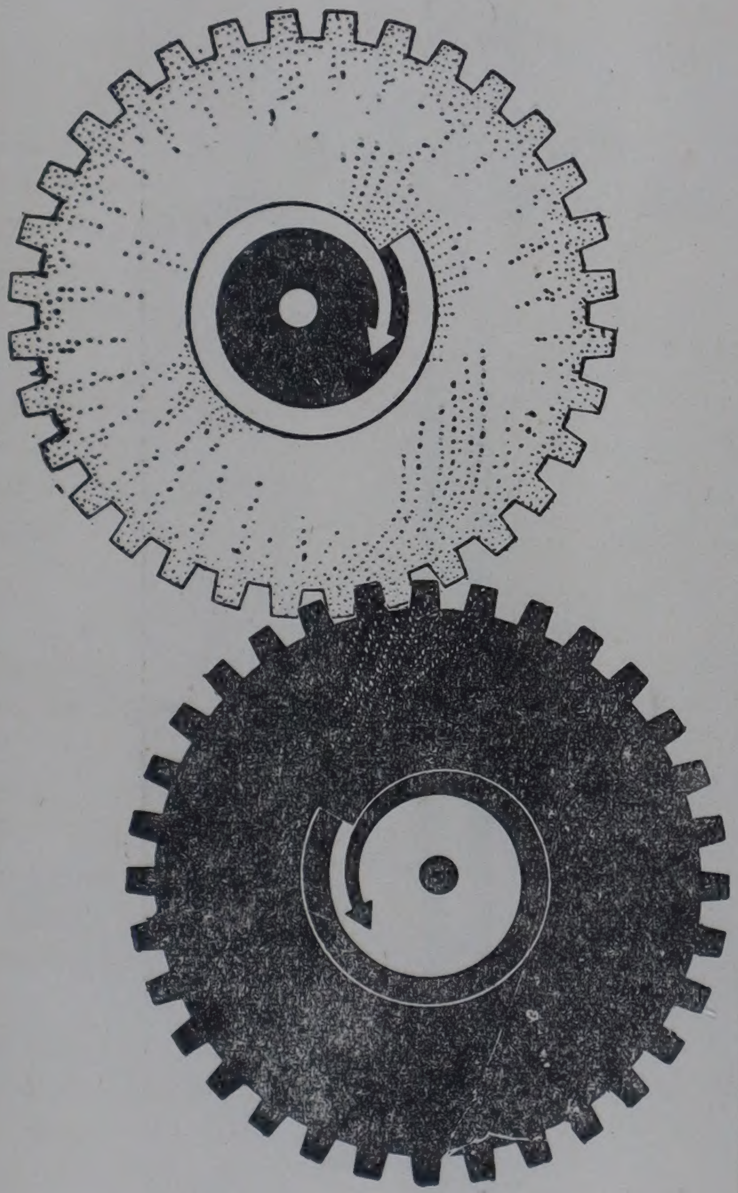
Setting the wheels in non-stop motion



Kirloskar Electric Company. A vital source of power to industries. Keeping the wheels of production rolling, without interruption. Ensuring perfect quality and maximum productivity.

Kirloskar Electric equipment provide the prime drive in a wide spectrum of continuous process industries — synthetic yarn, textile, paper, cement, sugar, petro-chemical, chemical, fertiliser, rubber, steel, machine tool, automobile and other engineering industries. In fact, the Company has been a part of the industrial revolution in India for over three decades. Major textile machinery manufacturers like Lakshmi Machine Works, often call on Kirloskar Electric to design special drives for their textile equipment, from blow room to calendering and printing.

Process industries opt for the Company's custom-designed drives, made to exacting specifications. Similarly, industries calling for environmental protection like explosion-proof, increased safety and IP-55, have found a dependable source in Kirloskar Electric. A trust further proved by repeat orders from manufacturers of compressors, conveyors and material handling equipment.

With the advent of Variable Speed Drive Systems, Kirloskar Electric DC Motors with Thyristor Controls are in great demand by systems designers throughout India for all industrial applications. The Company's specialist engineers are always available on call for consultation.

Kirloskar Electric Company moves into the future with its tradition of serving the nation through technological progress.

PRODUCT RANGE

AC Machines—Motors upto 1800 kW and Generators upto 1875 kVA • DC Machines upto 500 kW • Geared Motors • Variable Speed Drives • Welding Equipment and Systems • Transformers upto 25/50 MVA 220 kV • Control Systems • HF Induction Heaters

1979 was the Year of the Child. But in Hoechst every year is the Year of the Child.

Children in India, like these elsewhere in the world, have a long life ahead of them. But will they grow up or die of hunger and disease?

In the Hoechst Research laboratories world wide scientists relentlessly fight disease and death to shape a healthier world.

There are many diseases which cannot be cured with the available drugs. For newer and better drugs much time, money and dedication has to be invested. And Hoechst does it world wide. Including India.

At the Hoechst Centre for Basic Research in Bombay skilled and experienced scientists are ceaselessly researching. To find better products. Newer applications. For a better future for our children.

To protect health, to prevent disease and to prolong life are commitments of Hoechst to the future.

Hoechst

Pardon us if we appear to be nosy parkers – we must know WHO'S WHO

We must know who's who in the engineering field. We've got to pry into their design ideas. Find out more about their manufacturing techniques. Study the performance of their products. The whole idea is to serve industry better. Make more sophisticated design in plant and equipment possible. Improve manufacturing methods. Preserve the highest standards in product performance. In short, we aim at going ahead of most people in the engineering field. But to do that we've got to know a lot about most people. We've got to be nosy parkers.

Preface

INDIA WHO'S WHO—arranged professionwise—is intended primarily to serve the needs of the public for authoritative source of basic biographical information about Indians who, by virtue of their position and achievements have gained recognition. Individuals who are active have only been listed.

Names have been included to make this WHO'S WHO a reference work. Persons holding important positions in civil, military, educational, business organisations and those who are a subject of reference interest and inquiry have been listed.

For convenience, this annual publication is divided into seven main sections, each with allied professions grouped under it.

Biographical details of many persons could not be collected for want of response from them. Entries which have not been confirmed for the last two years have been dropped. An asterisk before a biography indicates that old entry has been repeated for lack of current information.

This Twelfth annual edition has been carefully updated and revised to ensure accuracy. Changes in the bio-data entries were recorded during editing and production.

Life does not end at retirement from service. But your earnings do. That would be the time when you will most need money to start a business or income to meet your daily needs.

Under PNB's **Multi Benefit and Old Age Deposit Scheme,** your savings will be more than double in 8 years. For example, if you deposit Rs. 5,000 for 8 years, you will receive Rs. 11,020 on maturity. The maturity amount deposited in **Special Fixed Deposit Scheme** earns you a monthly income.

You can deposit a minimum of Rs. 100 under the **Multi-Benefit & Old Age Deposit Scheme** and Rs. 500 under the **Special Fixed Deposit Scheme.** The rates of interest are 7% p.a. for 12 to 36 months, 8.5% p.a. for 39 to 60 months and 10% p.a. for 63 to 120 months.

So start right now when you have a regular income. The more you save and the longer the period, the more you will receive on maturity of the deposit.

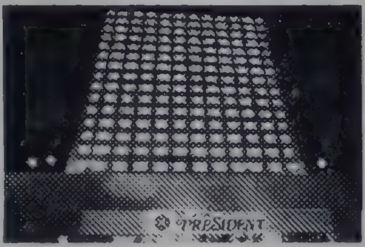
The finest hotel chain in India...

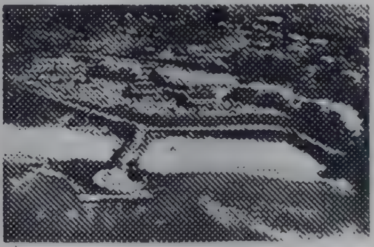
The Taj Mahal and The Taj Inter-Continental, Bombay

Two great hotels combining old world panache with 20th century splendour. The two hotels are, quite simply, like few others in the world.

Hotel President, Bombay

A recent addition, Hotel President is situated right in the city's business, shopping and entertainment area, offering excellent service.



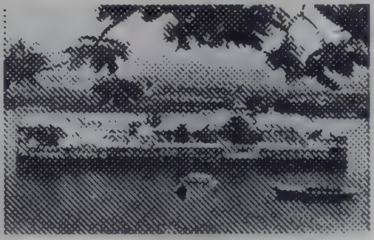


The Fort Aguada Beach Resort, Goa

Where a gentle sea beats... an old Portuguese ruin presides over a beautiful poem in brick and wood—The Fort Aguada Beach Resort.

The Rambagh Palace, Jaipur

Created at the height of the graciousness and splendour of Jaipur. Now offered to you as a hotel. A delicate fusion of the medieval and contemporary.

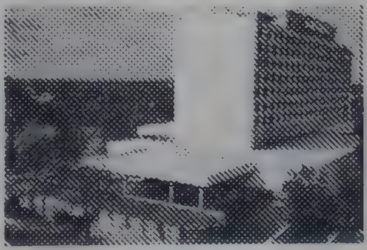


The Lake Palace, Udaipur

Once upon a time, the Ranas of Mewar held court here. Now it is a unique hotel. Complete with all manner of 20th century fittings and amenities.

Taj Coromandel Hotel, Madras

The finest hotel in Madras, mere minutes from the city centre. A serene reflection of the age-old Taj tradition.

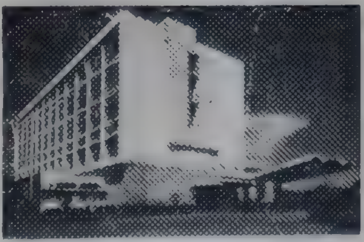


The Fisherman's Cove, Covelong Beach, Madras

Located on a secluded casuarina-fringed beach... like a golden secret. Just a 32 km. drive from Madras.

Pandyan Hotel, Madurai

In the heart of Madurai where transcendent architecture and sculpture are living monuments from the past.

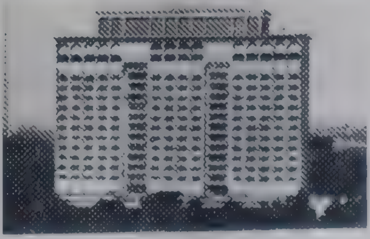


West End Hotel, Bangalore

Amidst Bangalore's lush environs, The Taj Group will transform the West End (by winter 1980) into a unique garden resort, so private it feels like your own. Ideal for a holiday or for the businessman.

The Taj Hotel at Benares

The only hotel of superior standards in the heart of the Holy City...close to where the Ganges flows and where the guest is held sacred. Opening January 1981.



The Taj Mahal Hotel, New Delhi

Ask a satisfied HSI customer

"I'd always dreamed of a beautiful bathroom...and now, it's come true ! When our contractor first showed us the Hindustan Sanitaryware catalogue, I was so excited. It was terribly hard to choose from all those lovely shades and styles. Of course, I don't understand much about it, but my husband said it's 'vitreous china', that's why it'll stay this beautiful for years and years. And the contractor said it's non-porous...so, very hygienic and easy to clean. Well, what more could I ask for ? I just know my bathroom will still look this lovely—after years !"

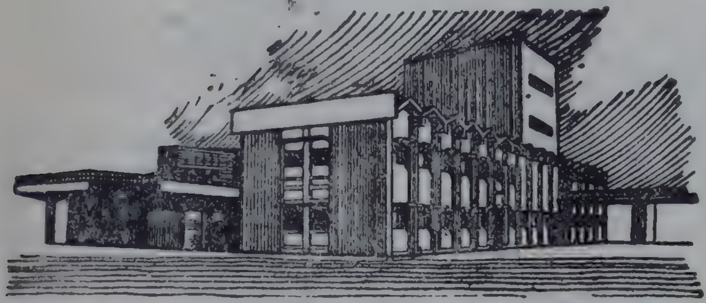
An organisation created by half a million farmers

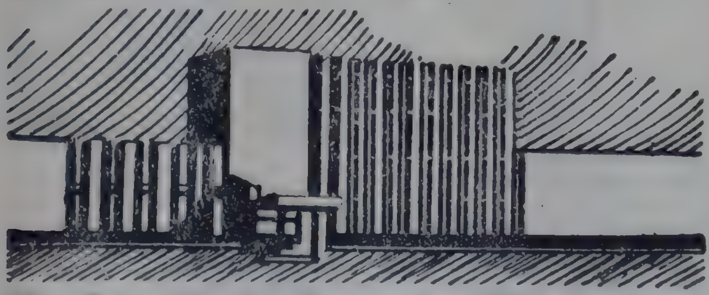
to handle 1.7 million litres milk a day

The Gujarat Co-operative Milk Marketing Federation Limited came into being in early 1974. The Federation is the apex marketing organisation of six district milk producers' co-operatives in Gujarat. These are:

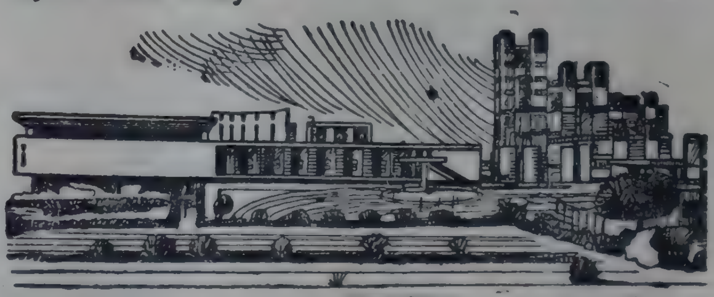


The Banaskantha District Co-operative Milk Producers' Union Ltd. Number of village co-operatives: 390. Farmer members: 32,000. Milk processing capacity: 1,50,000 litres a day.

The Baroda District Co-operative Milk Producers' Union Ltd. Number of village co-operatives: 475. Farmer members: 42,000. Milk processing capacity: 75,000 litres a day.



The Kaira District Co-operative Milk Producers' Union Ltd. (Amul). Number of village co-operatives: 829. Farmer members: 2,60,000. Milk processing capacity: 8,00,000 litres a day.



The Mehsana District Co-operative Milk Producers' Union Ltd. Number of village co-operatives: 485. Farmer members: 1,00,000. Milk processing capacity: 4,50,000 litres a day.

The Sabarkantha District Co-operative Milk Producers' Union Ltd. Number of village co-operatives: 400. Farmer members: 30,000. Milk processing capacity: 1,50,000 litres a day.

The Surat District Co-operative Milk Producers' Union Ltd. Number of village co-operatives: 180. Farmer members: 21,600. Milk processing capacity: 50,000 litres a day.

Farmers in Gujarat have shown that dairy co-operatives are practical, efficient and beneficial. The apex organisation now created will market all Amul and Sagar products as well as liquid milk processed by the six constituent units.

Every day in every way Meltron plays
a more and more important role in people's lives...

TOMORROW
BELONGS TO US!

Electronics has penetrated almost every walk of modern life. And Meltron, one of India's leading organisations manufacturing and marketing a wide spectrum of electronics products, is right in the forefront.

Meltron manufactures advanced semi-conductor power devices and broadcast communication systems. It markets a wide range of electronics products and components, which play a vital role in various important industries.

With its tremendous marketing infrastructure, Meltron reaches out to support many small scale units and makes sure it brings the social benefits of electronics to every corner of Maharashtra, every area of the country.

But Meltron is not content to rest on its laurels. Two new projects are being planned—the radio communication systems and the electronic PABX systems—which will go a long way in helping Meltron establish its aim of a total communication culture.

Yes, electronics is making today's science and industry progress with giant leaps. And Meltron is racing ahead—planning for a better tomorrow.

Tomorrow is an exciting country

Today, the entire world is concerned about the future, about tomorrow. As an integral part of this world, we too have certain duties to fulfil, specific promises to keep.

Technology has given us the strength and the direction towards a more fruitful life. A better life that can be enjoyed by more and still more people all over. Problem of industrialization, growth in population, social health and education, depletion of resources-are some that always accompany development.

But all these focus on the fact that gainful application of science and technology holds the key to an exciting future.

The years to come will see industry growing bigger, cities getting tâller and fields becoming greener leading to better values of human life.

We, in Durgapur Steel Plant engaged in producing the basic material for engineering, industry and agriculture, are keen towards building a better tomorrow.

Hindustan Fertilizer Corporation —a Rs. 500 crore dedication to the farmers, —geared to produce more than one million tonnes of fertilizer annually in the form of Ammonium Sulphate, Urea and complex fertilizers. Hindustan Fertilizer Corporation came into existence in April 1978. The Corporation has three Units at Namrup (Assam), Durgapur (West Bengal) and Barauni (Bihar). Besides, a project at Haldia (West Bengal) is in an advanced stage of completion. On completion of the Haldia project HFC will also be producing Methanol and Soda Ash, two important basic chemicals for the industry.

MPM is committed to paper. And meets the challenge.

MPM's Rs. 140 crore expansion now forging into reality

MPM, one of the oldest paper mills is fast becoming the largest — in one location, in the country. Nearing completion is its ambitious venture on paper, the Rs. 140 crore expansion programme.

Bhadravati has just now witnessed the high pitch activity of the erection and installation of the newsprint machinery. Best of brains from India and abroad are at work here, with technology from Finland and equipment from world leaders.

Right now hundreds of MPM men are at work to complete the most modern Chipper House, Pulp Mill, Coal Handling system, Electrical Distribution system and a variety of intricate and sophisticated networks. Forestry development in 75,000 acres in a phased plan is another challenge at hand.

All to ensure that MPM will soon reel out the story of newsprint, writing, printing and packing paper. Adding, annually, to the national resources 75,000 tonnes of newsprint and 37,000 tonnes of other varieties. Helping to narrow the supply-demand gap.

Progress-the medium is paper

You have a choice of two:

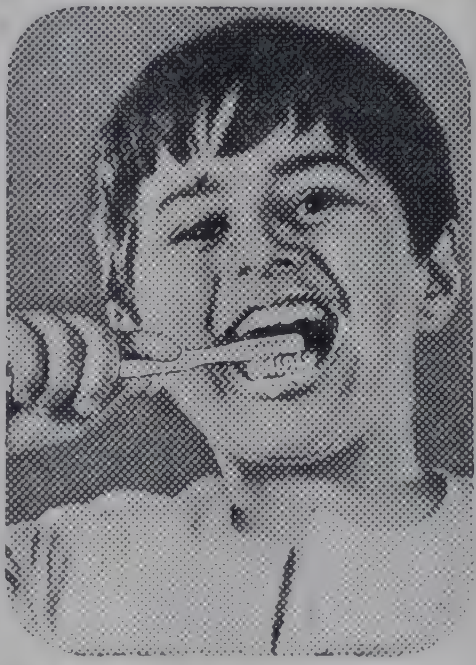
Forhan's for the gums
in the familiar orange pack

and now...in a bright blue pack

Forhan's

with active Fluoride to check cavities too.

It tastes good!



It foams!

It has Fluoride!

Forhan's protection for the gums

If gums are weak and spongy, even your healthy teeth may loosen and fall out. Brushing with Forhan's helps keep gums strong and healthy.

Fluoride protection for the teeth

In children, Fluoride hardens tooth enamel, protecting it against cavities. In adults, the Fluoride in Forhan's strengthens the resistance of enamel to decay causing germs.

In a bright blue pack.

Forhan's with Fluoride protects both gums and teeth.

ST PARCEL SERVICE
SAFE • SWIFT • SURE

The network of ST Routes is spread all over Maharashtra and parcels are carried on top of the buses plying on these routes.

ST Parcel Service has proved to be a boon to the rural populace in Maharashtra, because a farmer can now quickly despatch his goods to the market place and a shopkeeper can get his requirements like medicines, cloth, books, etc., without difficulty.

Today ST has 368 Parcel Offices in the State, 268 of them at places not served by railways.

Since 1958 we have been digging...

...and steadily developing the country's mineral resources.

Alongside we have also helped make India self-sufficient in planning, designing, erecting and operating large mechanised ore mines. And set up a comprehensive R & D establishment to help expand our activities still further.

Today NMDC

- — operates 3 large mechanised iron ore mines and processing plants.
- — has completed investigation of several iron ore deposits.
- — is planning to set up a pelletisation plant using the latest technology.
- — works the only diamond mine in the country at Panna.
- — is on the verge of crossing the Rs. 6000 million mark for foreign exchange earned from its ore.

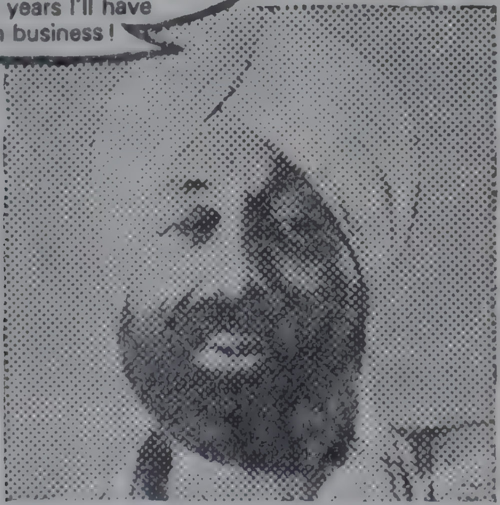
These days, who will give
you Rs. 20,000/- when you need it most?

HELP YOURSELF
with IOB's Reinvestment Deposit Plan.

I put the money my father left me into a Reinvestment Deposit Plan. Now, I won't have to worry about my son's medical education when he finishes school.



When my LIC policy matured I invested my money wisely. I started a Reinvestment Deposit Plan at IOB. In 5 years I'll have my own business!

The profits I made last year are growing in my Reinvestment Deposit Plan at IOB. Soon I can start another cafeteria.

IOB's Reinvestment Deposit has always been profitable. These days, thanks to the enhanced interest rates it's even more so. You can get upto 16% return on your original investment.

If you have a lump sum of money that you don't need an immediate return on, put it in our Reinvestment Deposit Plan.

Take a closer look at RDP

Instead of paying you the interest on your deposit every quarter, we plough it right back to add to your original deposit. So that your interest earns more interest. And your deposit grows and grows.

A deposit of Rs. 10,000/- will grow to become Rs. 19,965/- in 84 months.

If you receive a lump sum of money as a gift, or as bonus or insurance return-open a Reinvestment Deposit Plan at IOB. Your deposit turns into big money.

Come to IOB.
We have great plans for you.

The folk art of Saurashtra

The Role of the Colorist in Indian folk art

The dazzling tribal folk art of Saurashtra, India, is reminiscent of the rich heritage of the Kshatriya warrior communities & artisans. The art incorporates embroidery & dyeing.

The subjects are varied, depicting stills of deities, nature & human life.

The resplendent effect of the finished work makes it an ideal decorative hanging.

The design is worked on white cloth. The figures are outlined with ink or soot and a powdered mixture of red brick & soaked rice grains and embroidered in chainstitch.
They are then tinted with various indigenous vegetable dyes to give the work a magnificence of colour. Beads, threads & small mirrors are sewn on. The result is a vivid, vibrant work of art.

Indian dyes have come a long way since then.

With the advent of Synthetic Chemical Dyes, indigenous vegetable dyes have gone out of use.
Atul produces a wide range of Synthetic Dyes which help colour everything from fabrics of cotton, jute, wool, art-silk and man-made fibre, to leather and paper.

Atul also produces Dye Intermediates to help make Synthetic Dyes, and Optical Whitening Agents which make whites look whiter.

Wherever there is colour, there is a dye. Atul makes some of the finest man made dyes.

Commitment to freedom is a basic tenet of Haryana's policy. We cherish freedom above all else. But we are conscious that freedom does not mean licence. It entails responsibility.

It has been our endeavour to nurture the growth of free press in Haryana. We value constructive criticism from all quarters. For it is the very essence of democracy.

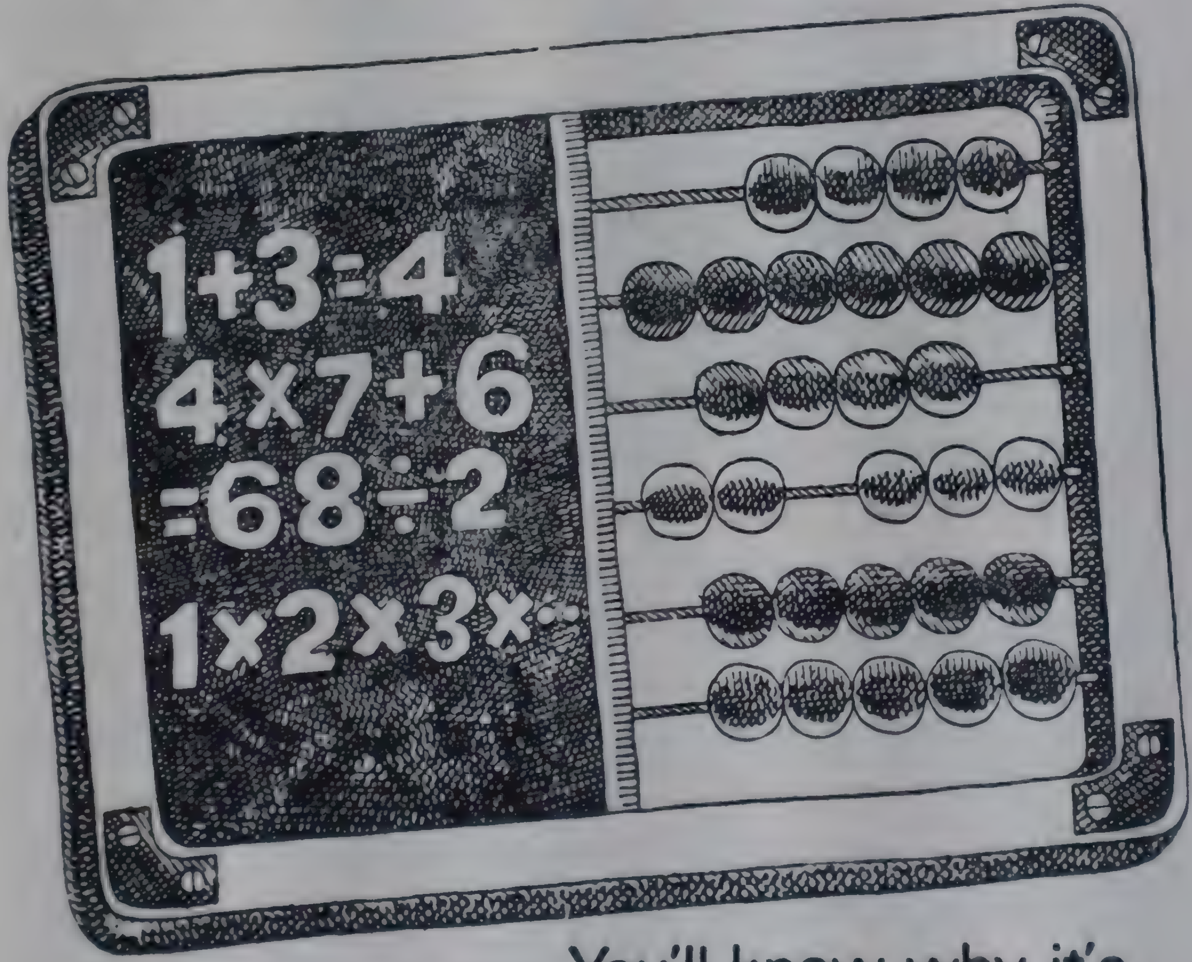
Before you go to bed tonight, count how many times steel has touched your life today



You'll know why it's called the economic multiplier

Right from kitchen utensils in which you prepare your morning tea, blades you shave with, transport you commute in, furniture you use, the watch you wear, —steel touches your everyday life in a hundred different ways.
Not just in cities. But in villages too. Where ploughs, pump sets, threshers, bullock cart axles, trucks, tractors, are all made of steel. And the list goes on

As the vital core metal that steers the nation's economy, steel means progress of the country. It ensures employment and prosperity. In industry, agriculture, transport, defence, energy, human life and welfare.

SAIL understands this. And strives to fulfil the nation's need for steel.

EARLY EXPLORATION IN ASSAM

Thirty years or so before drilling of the world's first oil well in the U.S.A. in 1859 — men were exploring Assam — not for petroleum but for coal. They found both.

An officer recorded the evidence of oil but took no further notice of it. Later, an agent of the Governor-General travelled by the Disang River and collected a quantity of oil. Still no one cared. It was when — in 1865 — a visiting Government geologist recommended experimental borings near Dihing River things began to move quickly.

Oil is now being produced from places close to both these rivers — Disang and Dihing. But the pioneers concentrated at a place close to another river — Digboi. This oilfield, one of the oldest in the world, is still producing the most essential commodity for India's industrial development — oil.

We now serve metals -hot or cold

MECON is now serving the steel and non-ferrous industries with the latest technology for Hot and Cold Rolling Mills and Processing Lines —a total turnkey service.

For Mishra Dhatu Nigam Limited, Hyderabad—India's first Super Alloys Project—MECON has designed, supplied and erected One Bar Rolling Mill and one Wire Rod Rolling Mill.

The Bar Mill has been commissioned in May 1980 when 100 mm x 100 mm stainless steel hot billets rolled down to 30 mm rounds with excellent tolerance. The Wire Rod Mill has been commissioned in August 1980 when hot bars were rolled into wire rod coils with close tolerances. We feel humble at the success at MIDHANI and we salute MIDHANI for the confidence reposed in MECON for these TWO HOT ROLLING MILLS.

MECON scored a 'DOUBLE' with the successful commissioning in February, 1980, of the Cold Rolling Mill Project of STEEL STRIPS LIMITED, Chandigarh. Located at Jitwal Kalan, a backward area in Punjab, this project has already started supplying quality Cold Rolled Strips in the market. MECON rendered complete consultancy and engineering services—from concept to commissioning—besides designing and supplying the 4-High Reversing Cold Rolling Mill—the heart of the project.

A similar Cold Rolling Project was conceived and commissioned by MECON in June, 1977, for NAGARJUNA STEELS LIMITED, at a greenfield site at Patancheru, a backward area in Andhra Pradesh. Today NAGARJUNA STEELS is a name synonymous with quality Cold Rolled Strips in the Indian market. MECON proudly shares the success of NAGARJUNA STEELS LIMITED and of STEEL STRIPS LIMITED for their Cold Rolling Mill Projects.

And that's not all...

- MECON is revamping the Hot Strip Mill at the Rourkela Steel Plant on turnkey basis. The mill will incorporate most advanced technological features like Hydraulic Automatic Gauge Control for the Finishing Stands, Thyristor Power Supply System, New Vertical Mill Stand, upto-date Strip Cooling System.
- For the Silicon Project at Rourkela, MECON is designing and supplying an advanced 4-High Reversing Cold Rolling Mill. MECON is also designing decarburising and tandem annealing lines for the same project.
- At Bokaro Steel Plant—MECON is designing and supplying most sophisticated cold rolling mills like 5-Stand Tandem Mill, a Twin-Stand 4-High Double Cold Reduction/Temper Mill and a Single-Stand 4-High Temper Mill.

  MECON is also designing a number of high-capacity continuous strip processing lines for this steel plant.
- A modern 2-High Hydraulic Skin Pass Mill is being designed and supplied by MECON for stainless steel application for Salem Steel Project.

Yes, with its expertise and experience, MECON is on the move—helping the steel and non-ferrous industries to roll out better products and ensure greater productivity.

tribal india joins the march of progress

Remote places in Mayurbhanj and Bastar, the Tribal hinterlands of Barajamda, Guva and Barbil are now on the modern economic map of India.

Iron ore mines have opened up new vistas for thousands. Better clothing, food, medicine, education. The fruits of progress brought in the wake of employment.

MMTC's export efforts lead to laying of 700 Kms of new Railway line. They opened up lifelines of communication between farflung places cut off from modern India for hundreds of years.

The railway lines carried ore traffic. They also developed awareness of the common bonds. Tribal regions are now marching ahead with the rest of India.

Meeting the Basic Needs of our People–IPCL's Endeavour

The age when earth's resources were used for the benefit of the few has faded.

It is the crusade of the public sector to meet the growing needs of the millions, to satisfy their aspirations for a better tomorrow.

IPCL is deeply involved in this crusade for equal opportunity and justice for all. For every product that is produced from our intermediates contributes to the common man's needs for food, clothing, shelter and protection against ill health.

Soon, IPCL will be an important factor in increased agricultural output, increased irrigation facility, better packing for food, increased industrial outputs.

IPCL belongs to the people. They should reap its benefits.

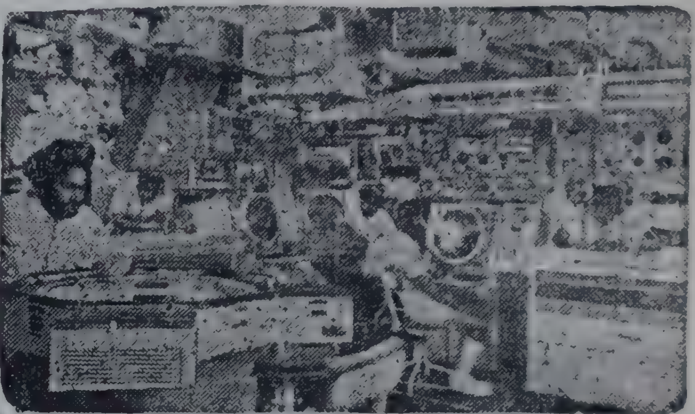
BEL... In 25 years vertically integrated from base materials to versatile electronic systems



Materials Devices Modules Equipment Systems

About 25 years ago, the electronics revolution had just begun. Bharat Electronics Limited played its modest part in this revolution with the production of just two items. The design was foreign, the components were imported, put together, assembled, tested and delivered to BEL's first customer.

In 25 years, the demands of industry and the requirements of national security have led to the development of ever more complex systems composed of different equipment performing diverse functions configured into complete systems to serve national needs.

In these 25 momentous years, from its modest beginnings, BEL has grown into a giant national enterprise manufacturing 350 different products to serve the diverse needs of such national customers as the Defence Forces, Police, All India Radio, Doordarshan, Railways and Civil Aviation. Today BEL is self-reliant in design capability. A majority of BEL's products are the result of its own Design & Development.

The story of this transformation at BEL is the story of the build-up of three tiers of vertical integration. In the first tier, BEL transforms raw materials into parts — a crucial step that distinguishes a self-reliant industry from a dependant one. In the second tier, BEL's different Divisions integrate parts into functional modules and reliable equipment. In the third transform making up the last tier, BEL configures different items of equipment into complete systems to serve the needs of a variety of customers, both in India and abroad.

Here comes India's first ever 13-tonner...

Ashok TUSKER

to carry more load-to earn more profit

At 13 T it's now India's heaviest vehicle in the medium duty range with the permissible rear. axle rating and with over 1 T extra load carrying capacity. The result? Extra income of well up to Rs. 20,000/- a year!

It's already quite a sensation: the latest from Ashok Leyland, Ashok Tusker—India's first ever 13 tonner.

A result of Ashok Leyland's R & D, it is designed on the higher payload concept—with the front axle strengthened by 1 T. Yet it is well within the permissible limit of 8 T per axle.

About Rs. 20,000 extra earnings for the extra tonnage!

Higher load carrying capacity naturally means higher profit. And with Ashok Tusker, it could easily mean an extra income of Rs 20.000/- a year.

Larger loading span too:

Ashok Tusker has a 40.7 cm longer loading span. Which means extra loading area that's specially helpful for carrying heavy, bulk loads.

The most powerful engine: 125 BHP

That's right. It's an AL 400 engine, 125 BHP at 2400 rpm—capable of delivering a torque of 41.5 kg m at 1600 rpm. The result: it has more haulage power, larger reserve power and naturally, higher power to weight ratio.

What's more, the engine, built on Ashok Leyland technology with groove insert piston and hardened liners, lasts much longer, consumes less engine oil.

Tusker's strong points

A big, strong clutch—35 7 cm in diameter, designed to cope with the high torque output of the engine.

More stopping power—to match the extra driving power, the total stopping area being 3580 sq cm.

Stronger, bigger front axle beam, front axle bearings, propeller shaft, and axle arms—all designed to take on the additional load.

And, of course, the 125 BHP engine!

Once again, ONGC's search for oil has met with success. The first well drilled on the Godavari offshore structure has shown promise. And this is just one of the series—hopefully—of happy endings to an endless story.

The oil find in Godavari basin is the first ever in the Bay of Bengal. It has brightened the prospects of producing more oil. Godavari is a landmark in offshore drilling as it is the first oil well in the deeper depths of water drilled by a dynamically positioned drillship—another phase of technological leap in the offshore front.

Another recent promising discovery by ONGC is of gas in the first exploratory well off Port Blair.

On shore, too, ONGC has found gas in North Gujarat, oil pools at Pansar and West Motwan fields. ONGC has extended the oil fields and pools in the West Sobhasan, Jhalora and Sisodra fields.

Presently, ONGC operates 9 geological, 2 shallow drilling, 4 gravity-magnetic and 24 seismic parties on land; 32 drilling rigs on shore and 5 rigs offshore. The total oil production, on shore as well as offshore, was about 73 million tonnes as of March 1980. The annual rate of production has already reached over 10 million tonnes and is expected to exceed 19 million tonnes by 1984-85.

ONGC will extend its exploration efforts to more and more areas—continuing its ceaseless search. Driven by a hope that it will all end well in an oil well.

All's well that ends in an oil well

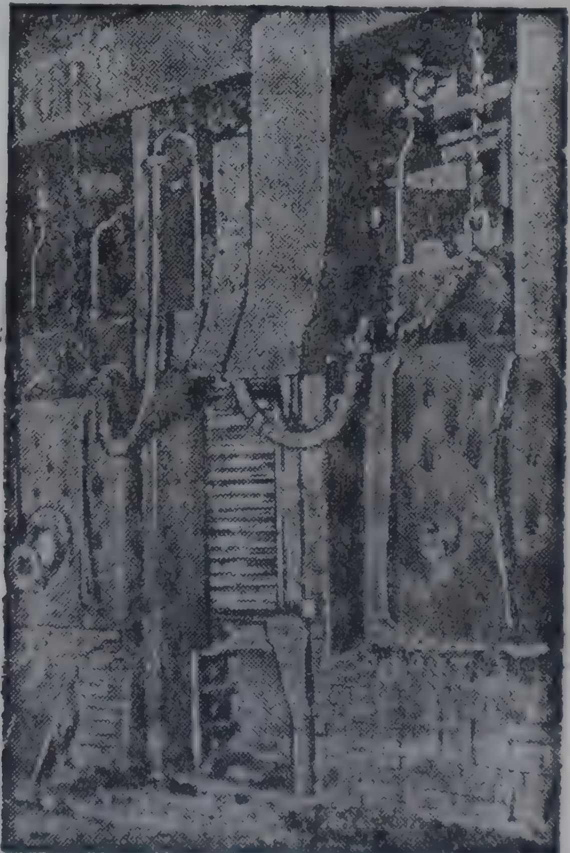
WHY OCL
REFRACTORIES?
One reason...

FOR OPEN HEARTH FURNACES...

OCL were the first indigenous suppliers of basic tab-hanger bricks for roof, whose service life surpassed that of imported bricks.

OCL's R & D won a silver shield from the Government of India for pioneering indigenous manufacture of Fosterite Checker Bricks—an achievement in import substitution.



ORISSA CEMENT LIMITED

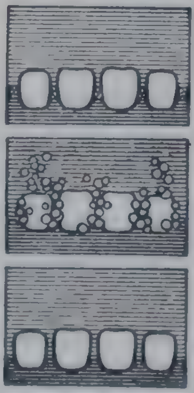
Stop bad breath...fight tooth decay with Colgate Dental Cream

Brush your teeth with Colgate after every meal. It protects you just the way dentists recommend all over the world.

Bacteria grow in food particles left between your teeth. These can cause bad odour, and later—painful decay.

So always brush the Colgate way right after eating. It's proven most effective to freshen your breath, whiten your teeth, and fight decay.

How Colgate's trusted formula works



Odour and decay causing bacteria grow in food particles trapped between your teeth.

Colgate's unique active foam reaches deep to remove dangerous food particles and bacteria.

The result: attractive white teeth, fresh breath confidence, protection against decay.

For cleaner, fresher breath and whiter teeth more people buy Colgate than any other toothpaste in the world!

For complete dental care use Colgate Trigard Toothbrushes. They guard tooth enamel, guard against dental plaque and guard gums. 8 varieties to suit everyone in your family.

Only a dentist can give you better dental care.

CLASSICS IN CARVING

There are 23507 temples in Tamil Nadu alone. This number might astound many of us who are familiar with only a handful of them. Hundreds of beautiful temples and carvings lie in obscure places, awaiting lovers of art.
Tamil Nadu can rightfully boast of a rich cultural heritage. The skill of sculpture and carvings in stone was practised here under the patronage of many dynasties throughout the medieval period.

The exquisite quality of Pallava Carvings can be seen in many rock-cut temples in North and South Arcot districts. The most notable examples of Pallava art are those dating back to the 7th century at Mamallapuram near Madras. The famous Tanjore temple was the beginning of the Chola Style of lofty gopurams.

The "Hall of Thousand Pillars" at the Madurai temple is an architectural marvel. Still more fascinating is the Hall with the Musical Pillars where each pillar gives out a musical note when struck.

There are the little- known temples of Ramnad and Tirunelveli districts which are magnificent in their own right.

The carvings reveal marvellous intricacy, and the decoration even in minute details, are executed with consummate mastery of technical forms.

Panchaloha, bronze, brass and copper images are numerous. The finest example is that of Nataraja, in cosmic dance, which is at once recognised all over the world as symbolic of Tamil Nadu Craftsmanship.

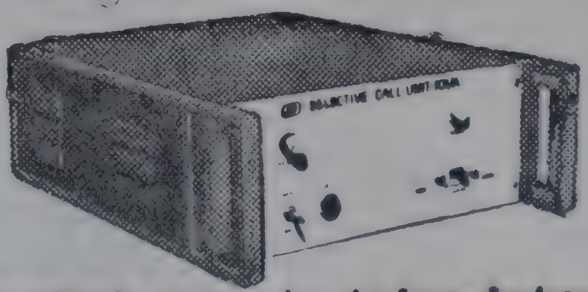
With our Data Modem the most remote computer is only a phone call away

This device aids in achieving remote data processing by routing digital data through normal telephone lines from digital output terminal to input terminal of a computer centre; and vice versa. Instant data teleprocessing finds ready application for Airline reservations, Hotel bookings, R&D and Educational institutions, Data banks, Industrial undertakings and also real time use of computers for process control.



Switch over to teleprinter circuit flexibility with SELECTIVE CALLING DEVICE

With these units a number of teleprinters can be connected on an omnibus circuit. Each teleprinter station can switch on to any other station while leaving rest of the circuit passive. The SCD finds ready application for rural areas, lightly loaded city telegraph offices, campus and multiple terminal points etc.

More than its temples and churches, Goa is now better known for its towering socio-economic Monument built by our tenacious and hardworking people.

Each year raises our peoples vision, hopes and faith in their strength and endeavours Goans have now multiple opportunities in agriculture industry and social reform.

A rejuvenated village has set its objective to a continued economic growth.

Panchayats and co-operatives have restructured agrarian economy.

A trained farmer freed from feudal clutches now adopts modern farm practices.

It is this solid edifice for which Goa receives eulogies from various parts of this community.

Tomorrow is an Exciting Country

Today, the entire world is concerned about the future, about tomorrow. As an integral part of this world, we too have certain duties to fulfil, specific promises to keep.

Technology has given us the strength and the direction towards a more fruitful life. A better life that can be enjoyed by more and still more people all over. Problems of industrialization, growth in population, social health and education, depletion of resources—are some that always accompany development.

But all these focus to the fact that gainful application of science and technology holds the key to an exacting future.

The years to come will see industry growing bigger, cities getting taller and fields becoming greener leading to better values of human life.

We in Durgapur Steel Plant engaged in producing the basic material for engineering, industry and agriculture are keen towards building a better tomorrow.

THE GOOD EARTH

AND INDEED ROURKELA HELPS GOOD THINGS GROW ON IT

The earth, Green and gold, Nurtured by rain, sunshine and human beings. Bountiful. Treasure-house of unplumbed wealth. From the fish in the waters to the lofty tree-tops. From the metals underground to the rich loam of the crust.

Many good things grow on this good earth of ours. Primary among them being food. Sustenance of man.

To-day, man aided by scientific advancements has put technology to work. Helping good things grow better.

Take farming for example, Bountiful harvests have become routine.

Food production has increased ushering in green revolution to meet the increasing demand of a growing population.

Increased mechnization, better fertilizers, pesticides, modern farming equipment, like tractors and power tillers, food-processing plants, packaging for year round availability, transportation-tracts, railways, ships, automobiles to reach food to the people.

All these have developed and matured under the wings of modern steelproduction. Steel to make machies, machines to farm, process transport. Machines to make good things grow.

Rourkela Steel Plant, one of the most sophisticated steel producers in the country, is helping the entire agricultural scene directly through CAN fertilizer 'Sona' from its huge fertilizer compled and indirectly through various categories of steel for various agricultural implements, steel for pipes for tube wells and water transport, steel for power industry to help better irrigation and steel for trucks, trains and ships to enable quicker movement of food grains.

Rourkela helps things to grow better still on the good earth.

ATTAR SINGH, IAS
Managing Director

You who worry about one family's rice and dal—

imagine being responsible for the rations of 130 million families

Checking and storing the best of rations for your own family is not such an enormous task, compared to what the Food Corporation of India does. FCI undertakes the responsibility of providing 130 million Indian families healthy and edible foodgrains. Families spread all over this vast land, each spared the worry of its next regular supply of rations. Because FCI, with its massive transportation, storage and distribution operations, assures every consumer a constant supply of foodgrains at a fixed and fair price.

The Food Subsidy is For you

FCI provides foodgrains at a price much lower than actual costs. Expenses are incurred at every stage of operations, from procurement to final distribution. For instance, FCI pays the farmer a procurement price of Rs. 117.00 per quintal of Grade I wheat. Over and above this, statutory and other compulsory charges like mandi fee, mandi labour, local transportation, purchase tax and cost of gunny bags paid by FCI amount to Rs. 20.64. This is within the mandi itself. Additional expenses of storage, transportation, interest on loans and administrative overheads amount to Rs. 23.41, resulting in a total cost of Rs. 161.05 per quintal to FCI. But the selling price to distributing agencies of various states is maintained at Rs. 130.00. The difference of Rs. 31.05 per quintal is met by the Government. This is the consumer subsidy, provided by the Government and channelised through FCI.

The Gain is Greater Than the Loss

Many lakh tonnes of foodgrains are handled by FCI while procuring at the mandi, weighing, grading, storing, transporting and finally distributing. This naturally results in a certain amount of spillage, for most of these complex operations are handled manually. There still exists a certain amount of dependence on temporary storage methods. These are open to the vagaries of nature like cyclones and rains, which may result in some loss. Yet losses have only been around 1%. FCI is constantly trying to minimise losses, by improving and increasing storage facilities.

The Cost of Feeding a Nation

Inspite of having to feed 130 million families, the expenses incurred by FCI in the handling of foodgrains are a mere 17% of acquisition cost. The bulk of this is incurred towards movement of foodgrains and interest on loans from banks. For all these various operations, what is spent on administrative overheads is only around 1% of the total cost.

Any operation as extensive and complex as FCI's will find itself faced with a number of problems. But the Corporation's constant endeavours are directed towards surmounting these problems and solving them in the best interest of the people.

OUR STATE IN 1980

This is a unique Republic Day the whole country has looked forward to. With renewed vigour, under the able guidance of our beloved Prime Minister, the country is assured of rapid strides in eradication of poverty, stability and self-reliance. It is our privilege that she is a Member of Parliament from our state.

On this historic occasion, it is my pleasure to recall the phenomenal progress Andhra Pradesh has made in every sphere of development.

While our State is foremost in harnessing the resourcess of nature for achieving record agricultural production, we have simultaneously taken up on an unprecedented scale industrial and welfare activities to ensure balanced development.

We are now implementing a plan of great dimensions not measured merely by budgeted outlays but also by the capacity we have generated to absorb resources from other agencies.

Industrial infrastructures and activities of connected institutions are at an all time high. We are sought after by investors from all over the country and our services are measured by the rapid growth of industry, development of skills and employment.

Our Irrigation potential created over years has not been subjected to rapid exploitation and the accent on development has attracted large capital for land development and seasonal operations.

We have achieved maximum distribution of land and intensified activity to import necessary strength among the small and marginal farmers to borrow adequate farm and seasonal funds to exploit the land assigned to them.

Unprecedented expansion in the field of poultry raising and dairying has increased self-employment with adequate and assured income besides contributing enough nutrition supplement.

We have hastened the implementation of our power plans by creating a generation capacity of about 1700 M.W. and launching a massive scheme of electrifying every village.

Our effort to take mechanised transport to villages has already started yielding results. New services, large fleets of vehicles and improvements to roads have opened new vistas to the world around and spelled also worthwhile employment in the countryside.

We have, again for the first time, laid emphasis on modernisation of the school programme at its basic level.The Abhyudaya Pradhamika Vidya Samstha Programme in now no more an experiment but an achievement.

With accent on community welfare, the weaker sections programme is oriented to family needs. Students from poor families get handsome scholarships and their needs are constantly reviewed so that they qualify themselves quickly for employment and enterprise.

With provision of large funds for houses sites and homes, we have made residence for every family our target. The construction of about 3,50,000 houses in the last one year itself is an indication of the massive time bound programme we have undertaken.

Our Corporations for weaker sections have become pacesetters in absorbing institutional finance and implementing family oriented economic support schemes.

These are but a few of the many activities that have ensured all round progress.

Andhra Pradesh is no mere a mere land of promise. It is a State of Achievements.

You'd hate to admit it . . . even to yourself.

But you do take your wife just a little bit for granted.

You're not exactly the tyrant about the house. But you do know that your way is the way it's going to be!

And it's not that you don't appreciate all that your wife does for you. It's just that somehow you forget to tell her.

Perhaps the time has come to do it.

Now, you're not going to embarrass yourself with a long speech on the subject.

No, no.

Just a little HMT will say it all. Beautifully.

All the care we put into it talks. For you.
